Cover Letter For Circle
9/16/23
Technical Writer
Conor Chepenik

Dear Hiring Manager,

I am thrilled to express my keen interest in the Technical Writer position at Circle. With a strong sales background and an evolving technical expertise, I am enthusiastic about the prospect of employing my abilities to elevate Circle's developer experience through exceptional documentation. In my role as a Commercial Account Executive at Datadog, I excelled in generating new business by effectively communicating complex technical concepts to prospects. This required me to swiftly grasp unfamiliar technologies and articulate their value, a skill set highly relevant to a proficient technical writer. My experience in sales has also honed my ability to empathize with customers, understand their needs, and address their pain points through documentation.

I've also been developing websites for over a year and while my technical writing experience is still maturing, I have a track record of delivering intricate technical presentations. Additionally, I am rapidly advancing my hands-on skills in areas such as HTML, CSS, JavaScript, and RestAPIs. I recently completed one of Boston's best coding bootcamp for full-stack developers called Launch Academy.

I've also been published in various magazines for writing about cryptocurrency. I am a quick learner who is deeply passionate about simplifying intricate subjects into clear and helpful documentation. My existing technical acumen, coupled with my exceptional communication and relationship-building skills, equip me to deliver top-notch developer documentation at Circle.

The mission of Circle resonates with me, and I am eager to leverage my skill set to empower developers in easily harnessing the potential of your platform. My commitment to ongoing learning, along with my proficiency in both technical and interpersonal domains, instills confidence in my ability to swiftly adapt to your technologies and deliver high-quality documentation. Thank you for taking the time to consider my application. I am eagerly looking forward to the opportunity to discuss it further.

Sincerely,

Conor Chepenik
